Health Planning & Management Library The Electronic Medical Record (EMR): Changing Clinical Practice and Culture

Australian Department of Health and Ageing, **e-Health**, (e-Health is the electronic management of health information to deliver safer, more efficient, better quality healthcare. The Australian Government has allocated \$188+ million to help facilitate the transition of paper-based clinical record keeping to electronic means for better information exchange.

Walsh, Stephen H, **The Clinician's Perspective on Electronic Health Records and How They Can Affect Patient Care**, *British Medical Journal*, Vol. 328(7449) 15 May 2004 pp. 1184-1188 (Poor communication is more often detrimental to patients than lack of knowledge. Computers should enable clinicians to capture narratives easily. The structure of the patient's record strongly influences the ease of information retrieval.)
<http://bmj.bmjournals.com/cgi/reprint/328/7449/1184>

Watson, Nigel and Halamka, John, **For and Against: Patients Should Have to Opt Out of National Electronic Care Records**, *British Medical Journal*, Vol 333(7557) 1 July 2006 pp 39-42 (Although some aspects of the NHS care record service have a broad consensus agreement, issues of consent and security are dividing health professionals, the public, and the national programme for information technology. Watson believes his experience of opting out shows it to be the most workable option, but Halamka uses a US model to argue that opting in is the only way to ensure confidentiality.)

Copies of these articles are available from the Library at a small charge of \$10.00 for the first article and then \$5.00 each additional article. All prices are inclusive of GST.

To obtain copies of articles, please contact Sue Brockway, Librarian, by phone (02) 9805 0125 or fax (02) 9889 3099, by mail PO Box 341 North Ryde NSW 1670 or by email to:
